## EDUCATION

### Worcester Polytechnic Institute

August 2022 – May 2026  
BS | Computer Science  
BS | Interactive Media & Game Development  
3.91 GPA

## ACTIVITIES

- **2025 WPI Pax East Booth** — Coordinated logistics for a team of 8 people and presented 5 student projects at the 2025 WPI PAX East booth
- **IGDA** — Active member of the International Game Developers Association
- **Computer Science Honor Society** — Member of Upsilon Pi Epsilon (Computer Science Honor Society)

## AWARDS

- Dean's List Honors
- High Distinction

## INTERESTS

- Competitive Video Games
- Electronics & Circuitry
- Woodworking

## SKILLS

**Languages** C | C++ | C# | Java | Python | JavaScript | TypeScript | HTML | CSS | SQL

**Game Engines** Unity | Unreal | Godot | OpenGL | SFML | LWJGL

**Tools** Git | Plastic SCM | Perforce | Agile | Scrum | Kanban | Waterfall

**Creative** Photoshop | Illustrator | Audition | Blender | ZBrush | Fusion360 | Wwise

## EXPERIENCE

### MassDigi — Producer & Programmer MAY 2026 – PRESENT (ENDS AUGUST 2026)

| Project Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Genre       | Game Engine | Team Size | Commitment |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|-------------|-----------|------------|
| Fishy Missile                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Casual Game | Unity       | 7         | Full-Time  |
| <ul style="list-style-type: none"><li>• Direct team operations by leading meetings and finalizing decisions while ensuring each discipline had input, and represent the team to program leadership.</li><li>• Lead mobile game development from ideation through prototyping and production, securing greenlights at ideation and prototype gates while supporting monetization strategy for ad integration and potential microtransactions.</li><li>• Produce and develop in Unity (C#) using Plastic SCM on a seven-person team composed of three programmers, three artists, and a shared audio contractor intern.</li></ul> |             |             |           |            |

### Chupacabra Productions — Producer & Programmer SEPTEMBER 2025 – MAY 2026

| Project Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Genre             | Game Engine | Team Size | Commitment |
