EDUCATION

Worcester Polytechnic Institute

August 2022 – May 2026
BS | Computer Science
BS | Interactive Media & Game Development
3.91 GPA

ACTIVITIES

- **2025 WPI Pax East Booth** — Coordinated logistics for a team of 8 people and presented 5 student projects at the 2025 WPI PAX East booth
- **IGDA** — Active member of the International Game Developers Association
- **Computer Science Honor Society** — Member of Upsilon Pi Epsilon

AWARDS

- Dean's List Honors
- High Distinction

INTERESTS

- Competitive Video Games
- Electronics & Circuitry
- Woodworking

SKILLS

Languages C | C++ | C# | Java | Python | JavaScript | TypeScript | HTML | CSS | SQL

Game Engines Unity | Unreal | Godot | OpenGL | SFML | LWJGL

Tools Git | Plastic SCM | Perforce | Agile | Scrum | Kanban | Waterfall

Creative Photoshop | Illustrator | Audition | Blender | ZBrush | Fusion360 | Wwise

EXPERIENCE

MassDigi — Producer & Programmer MAY 2026 – PRESENT (ENDS AUGUST 2026)

Project Title	Genre	Game Engine	Team Size	Commitment
Fishy Missile	Casual Game	Unity	7	Full-Time

- Direct team operations by leading meetings and finalizing decisions while ensuring each discipline had input, and represent the team to program leadership.
- Lead mobile game development from ideation through prototyping and production, securing greenlights at ideation and prototype gates while supporting monetization strategy for ad integration and potential microtransactions.
- Produce and develop in Unity (C#) using Plastic SCM on a seven-person team composed of three programmers, three artists, and a shared audio contractor intern.

Chupacabra Productions — Producer & Programmer SEPTEMBER 2025 – MAY 2026

Project Title	Genre	Game Engine	Team Size	Commitment
Treasure of the Sierra Madre	Digital Boardgame	Godot	6	Part-Time

- Implemented a multiplayer architecture in which players join from phones to a shared TV running a game built in Godot, using a custom WebSocket networking layer that emulates a standard client-server model through a cloud-hosted relay service built in TypeScript and SQL on Cloudflare Durable Objects and secured with static and dynamic HMAC tokens plus rate limiting.
- Built a data-driven procedural generation pipeline for a hexagonal grid and implemented a web client in TypeScript and Svelte, using game-state decision trees to drive player-specific views.
- Directed meetings and production workflow across a six-person multidisciplinary team.

MassDigi — Programmer OCTOBER 2023 – MAY 2024

Project Title	Genre	Game Engine	Team Size	Commitment
Rock On, Raccoon!	Rhythm Game	Unity	4	Part-Time

- Improved gameplay experience by tuning note timing and reworking the input system.
- Proactively drove codebase improvements to increase maintainability and support iteration.
- Contributed to an ongoing mobile title released on iOS and Android, releasing a new web build.

PROJECTS

Multiplayer Fruit Ninja — Solo Developer SEPTEMBER 2024 – OCTOBER 2024

Project Title	Genre	Game Engine	Team Size	Commitment
Multiplayer Fruit Ninja	Party Game	C++ with SFML 3	1	Part-Time

- Implemented TCP multiplayer network layer using Windows API calls for generic game objects in a client-server architecture with an authoritative server and client-side prediction.
- Engineered server-authoritative synchronization by validating client input on the server and using latency-aware prediction on clients to improve responsiveness while preserving server authority.
- Developed a C++ game engine using SFML for graphics, implementing a unified event-handler architecture where each game object is defined by a class.

Slime Game — Programmer & Marketer APRIL 2024 – APRIL 2024

Project Title	Genre	Game Engine	Team Size	Commitment
Slime Game	Puzzle Game	Unity	7	Part-Time

- Developed a grid system that enables location-based queries to support turn-based puzzle mechanics where all entities move in response to player actions.
- Presented at PAX East 2024 and additional showcases, developing presentation materials.
